Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem	I am	I'm trying	But	Because	Which makes me

Statement (PS)	(Customer)	to			feel
PS-1	Emily Johnson, Market Strategy Director at a global EV manufacturer	understand which vehicle categories drive annual sales, who the leading manufacturers are, and how satisfied customers are in each segment	sales, price, range and review data are scattered, so I cannot see category trends and high-growth segments in one place	here is no interactive executive dashboard that consolidates market performance, manufacturer results and customer preferences	overwhelmed and uncertain when making portfolio and investment decisions
PS-2	David Chen, Business Intelligence Manager at an automotive consulting firm	benchmark EV manufacturers on market share, sales, ratings and battery technology to advise clients entering the EV market	I cannot quickly compare manufacturers, see where production is concentrated or tell which battery technologies dominate	manufacturer, country and battery data sit in large unconnected datasets, and manual comparison is slow and errorprone	frustrated and worried that my recommendations rest on incomplete evidence
