Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a us
behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person
experiencing it. The exercise of creating the map helps participants consider things fro
user's perspective along with his or her goals and challenges.

Example:

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- Which vehicle categories drive the most annual sales?
- Who are the top manufacturers and how do customers rate them?
- I need one executive view to plan our product portfolio.

THINKS

- Which high-growth segments should we invest in next?
- Which battery tech (LFP, NMC, Solid-State) gives the best range and value?
- Scattered reports make it hard to trust the full market picture.

EMILY JOHNSON

(Market Strategy Director)

DOES

- Tracks sales, price, range and ratings across categories and regions.
- Benchmarks manufacturers and battery technology adoption.
- Presents market insights to leadership to guide portfolio decisions.

FEELS

- Pressured to make high-stakes strategy calls quickly.
- Frustrated by fragmented data that is hard to compare.
- Confident when insights are clear, visual and interactive.

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- Which manufacturers hold the largest market share?
- What do customer ratings say about each brand?
- My clients need data-backed advice before entering the EV market.

THINKS

- Where is production concentrated, and which countries lead?
- Which battery technologies dominate the market today?
- Manual comparison across datasets is slow and can miss key insights.

DAVID CHEN

(Business Intelligence Manager)

DOES

- Monitors manufacturer sales, market share and customer ratings.
- Compares production by country and battery technology mix.
- Turns findings into advice on product positioning and market entry.

FEELS

- Under pressure to give clients accurate, defensible advice.
- Frustrated by data sources that are not connected.
- Confident when competitive advantages are clear and provable.
