Business Question and Visualization Report

Date	24 September 2026
Team ID	PNT2022TMIDxxxxxx
Project Name	Ev vehicle market performance and insights
Maximum Marks	5 Marks

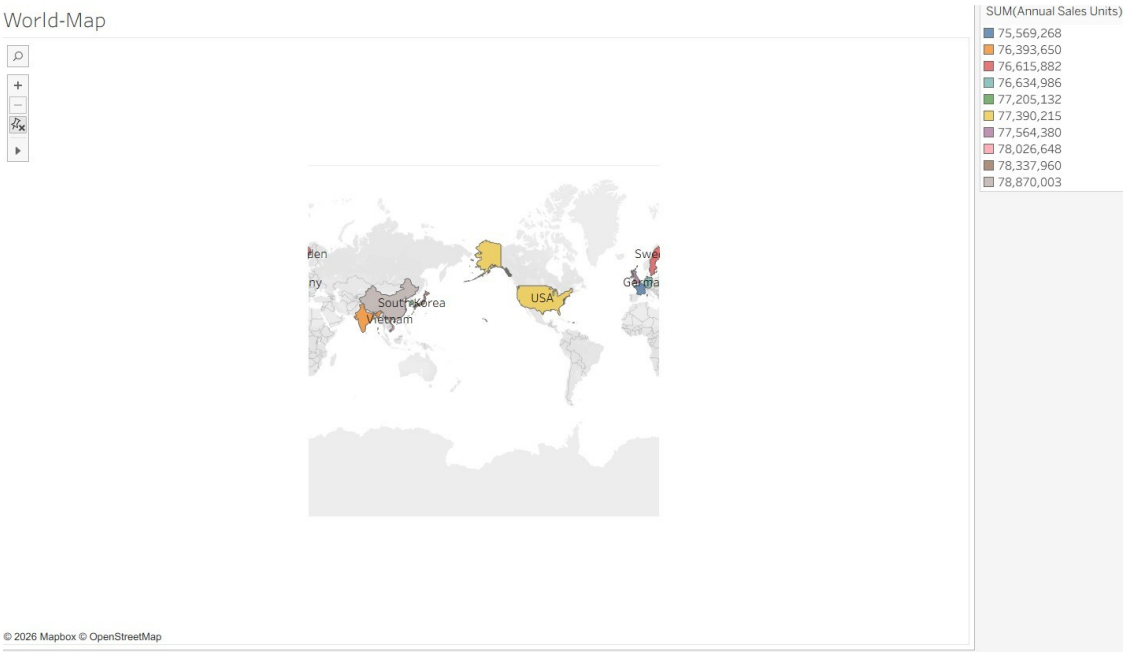

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience. This process is commonly associated with data visualization tools and platforms, and it plays a crucial role in business intelligence, analytics, and reporting

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations using data stored in Snowflake. Well-framed business questions help identify the required metrics, determine the appropriate Snowflake tables or analytical views, select relevant data, and create visualizations that provide useful business insights.

1. Which countries and vehicle categories lead EV production and annual sales?

Visualization through maps

2. Which manufacturers perform best on customer reviews and sales units?

Visualization through blocks

3.what is average customer rating?
Visualization through tree

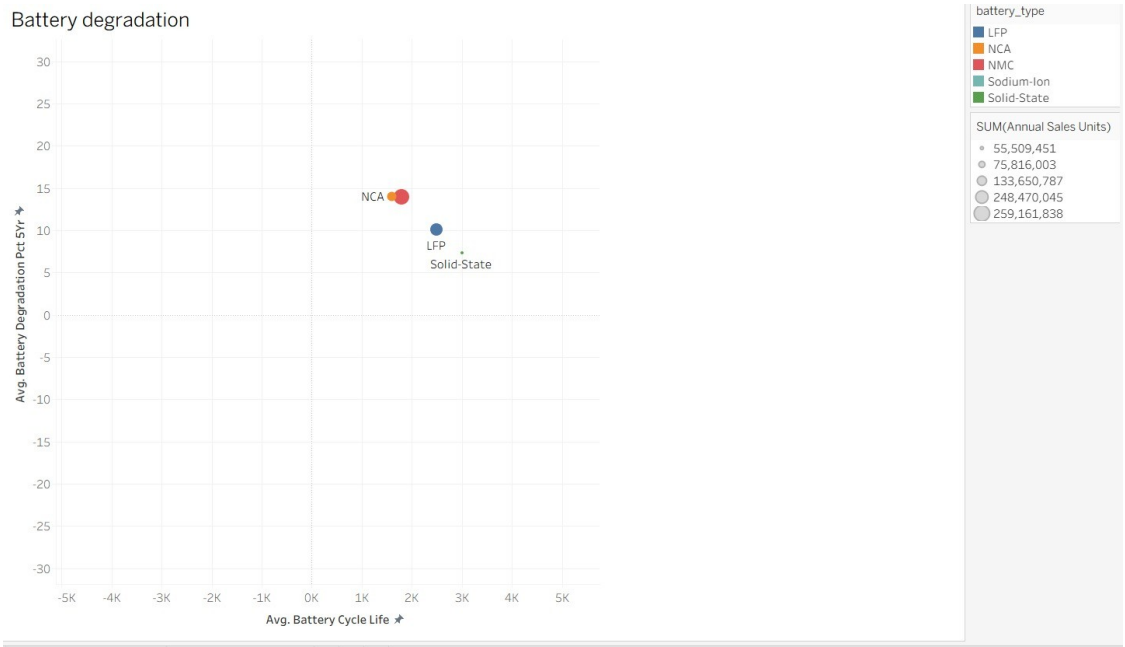

4.what is yearly comaprison between car types?

Viualization through percentage

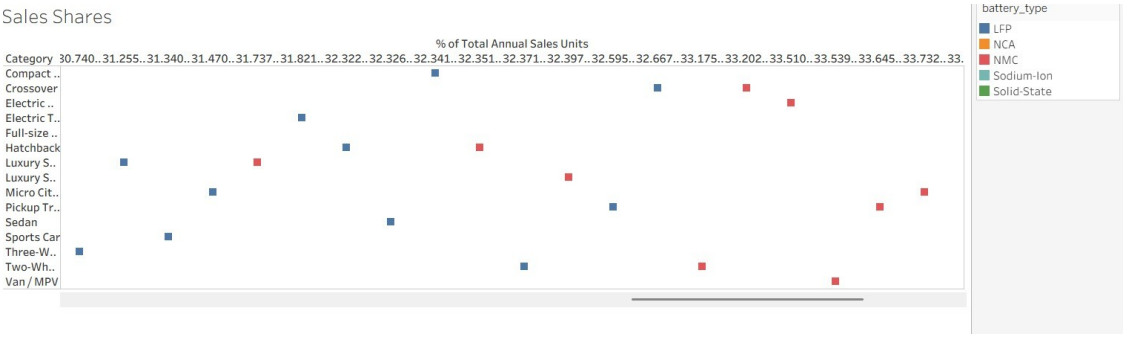

5.what is average battery cycle life?

Visualization through point graph

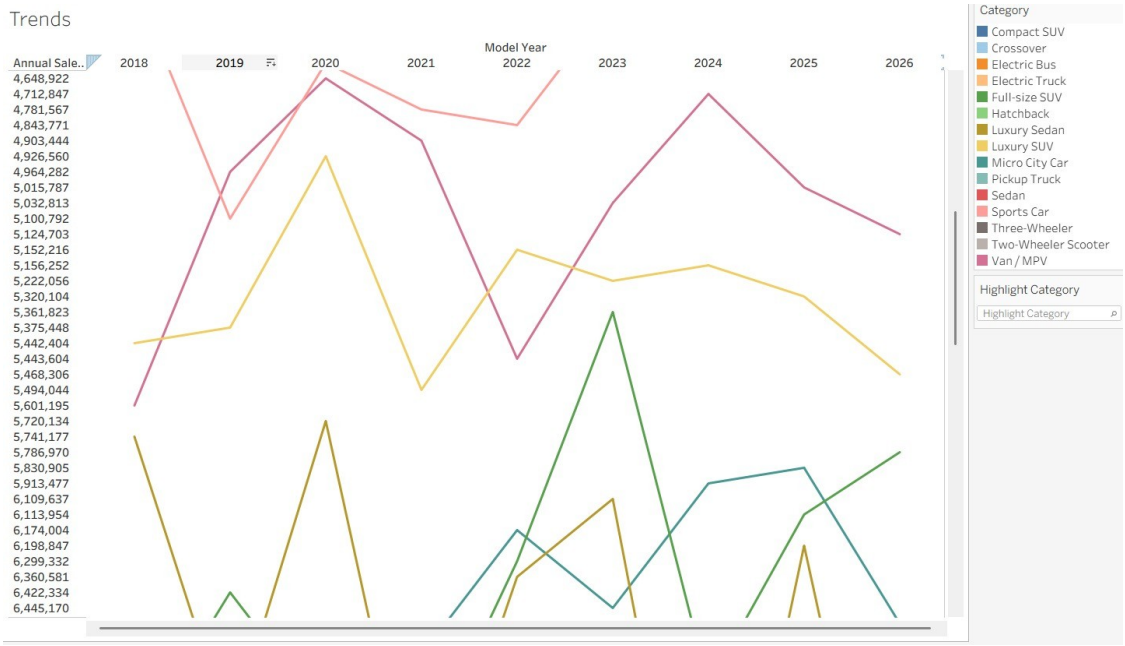

6.what is sale share between companies?

Visualization through graph

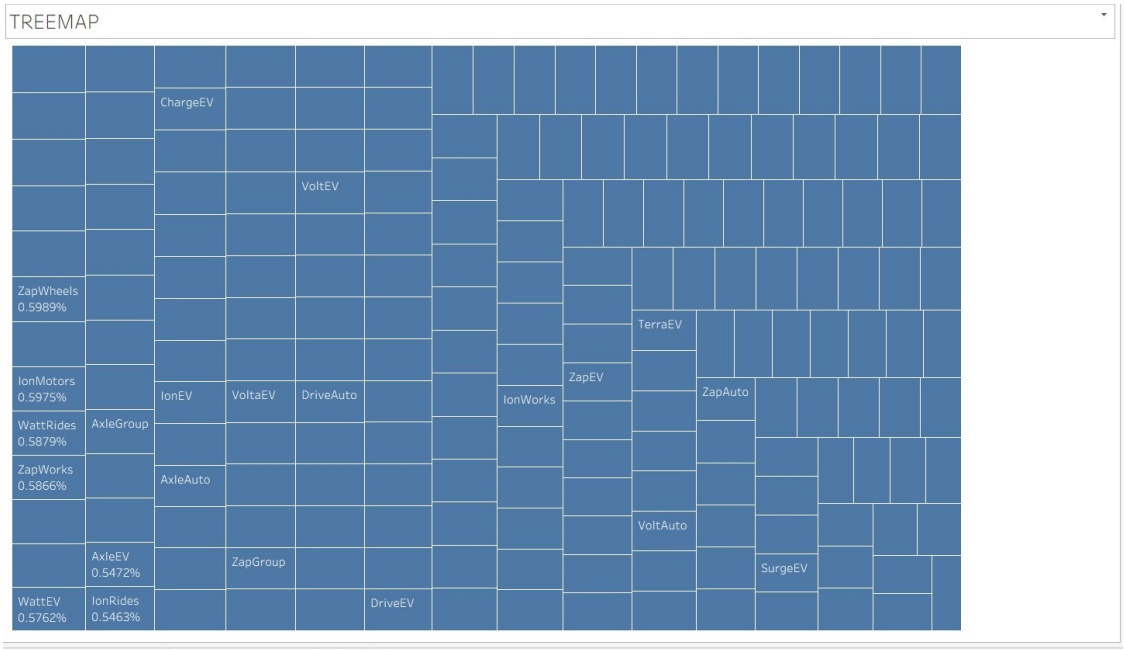

7.what trend share between different types of car?

Visualization thorugh graph

8.waht is percantage of manufacturing?

Visulaisation through tree map
