Dashboard Design

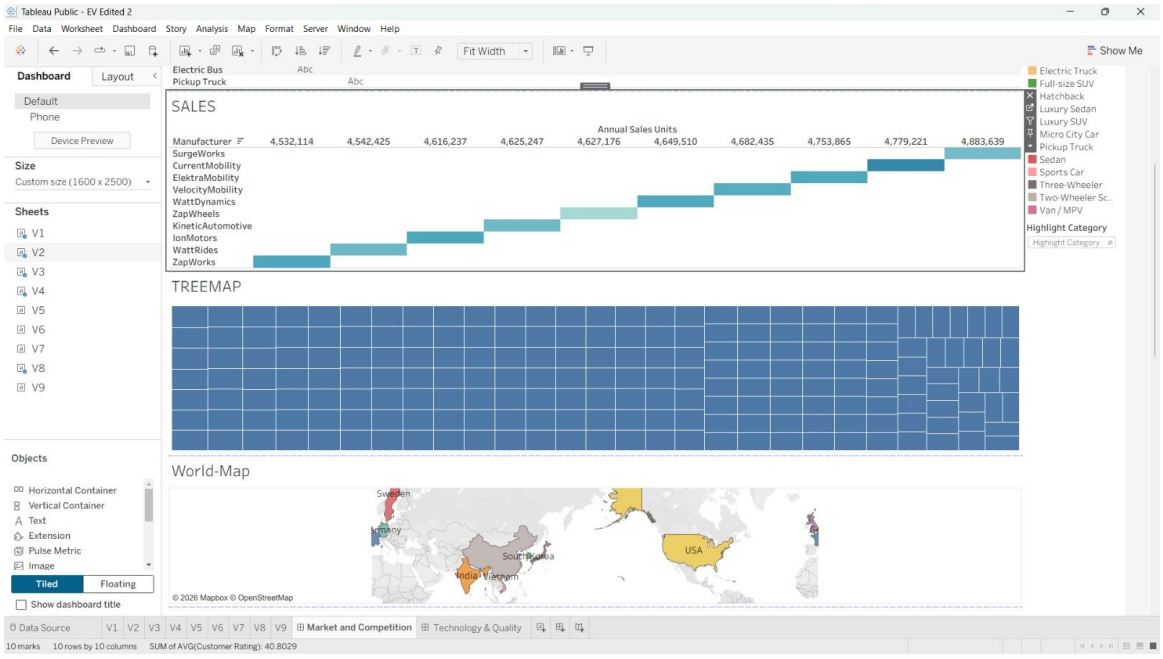

Date	24 September 2026
Team ID	individual
Project Name	Ev market performance and insights
Maximum Marks	5 Marks

Activity 1: Interactive and visually appealing dashboards

Creating an effective Streamlit dashboard involves presenting business data stored in Snowflake through clear, interactive, and easy-to-understand visualizations. Students should design the dashboard so that users can quickly understand important KPIs, trends, comparisons, and business insights.

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Major outcomes from the EV Market Performance and Insights dashboards:

● KPI Overview: Total EV sales are 1.55B units, with an average vehicle price of $64,921, an average range of 324.54 km and 738K tons of CO2 saved per year.

● Production Leaders: India, China and Vietnam lead annual production output, with the production mix spread across all vehicle categories.

● Retained Value: Electric Bus holds the highest 3-year retained value (14.5M), followed by Electric Truck, Sports Car (8.69M) and Luxury SUV (6.15M).

● Driving Range: Luxury Sedans and Luxury SUVs offer the longest range (about 550-600 km), while micro city cars and two/three-wheelers offer the shortest.

● Battery and Charging: NMC and LFP dominate battery sales; faster-charging vehicles (up to about 350 kW) consume more energy per km, and CO2 savings are spread across all regions.

Activity 2:

Publish Dashboard on Tableau Public and Paste the Dashboard Public link below:
